Projects

- **Toy Junction (Toys on Rent)**
  Description – It is a kind of online shopping system. The application provides user to take toys on rent. The USP of the app is that a child can play with the toys which are very costly after paying very minimal charges. The app provides huge number of toys.
  Technologies: Node.js, Express.js, Angular, MySQL
  Role: Full Stack Developer

- **Web Based Games**
  Description – The website consists of different types of games for PC. User has to give the information such as gamer name and email-ID before playing the game. Top 5 gamer names will show for each game. If user scores good and comes in the top 5 then he/she will get a mail for appreciation and his/her name will show in the topper's list. All the games are developed in JavaScript with the help of P5 library.

- **Chatbot (Food Order System)**
  Description – A chatbot which is responsible to take order from customer.
  Technologies – NodeJS, Bot Builder framework
