Projects

- ➢ **Train Info (**https://codingbyraj.github.io/traininfo**)**
  Description – The application consists various great features such as "Live status of train", "PNR Status", "Get Train Route", "Seat Availability", "Get Fare" and "Trains Between Stations".
  Technologies – Angular (2.x), HTML5 and CSS3

- ➢ **Todo Application (**https://codingbyraj.github.io/todo**)**
  Technologies – Angular (2.x), HTML5

- ➢ **Web Based Games (**https://codingbyraj.github.io/playcity**)**
  Description – The website consists of different types of games for PC. User has to give the information such as gamer name and email-ID before playing the game. Top 5 gamer names will show for each game. If user scores good and comes in the top 5 then he/she will get a mail for appreciation and his/her name will show in the topper's list. All the games are developed in JavaScript with the help of P5 library.
  Technologies – JavaScript, HTML, CSS3 and P5
  Role – Coding and Designing

- ➢ **Word Building Game**
  Description – The game is developed using C Programming language. The user or player gets few letters using which he/she has to make a meaningful word. If the answer given by user is correct then game will continue otherwise game will over.
  Technologies – C Programming Language
  Role – Coding

➢ **Attendance Management System**
Description – "Attendance Management System" is software developed for maintaining the attendance of the students on the daily basis in the college. Here the faculty, who are handling the subjects, will be responsible to mark the attendance of the students. Each faculty will be given a separate username and password. An accurate report based on the student attendance is generated. This system will also help in evaluating attendance eligibility criteria of a student. Report of the student's attendance on weekly and monthly basis is generated.
Technologies – ASP.NET, SQL Server 2008 R2
Role – Coding and Designing

➢ **www.saianveshcraft.com -** website for the company named "Sai Anvesh Craft".

➢ **Test Your Programming Knowledge**
Description – The website offers the students to test their programming skill. The website is very good for the computer programming learners to increase their knowledge in programming. It consists variety of questions of various programming subjects like C, C++, PHP, Database, Java, JavaScript etc.
Technologies – ASP.NET, SQL Server 2008 R2
Role – Coding and Designing

➢ **www.scanvtech.com –** website for the company named "Scanvtech India Pvt. Ltd."

➢ **Cricket Information Website**
Website – https://codingbyraj.github.io/cricadda
Description – The website gives information about the Cricket players. Here, the user can view the records of the cricket players. The website has a list of players and when the user selects any player and search for it then user will get records of the player in all format of the cricket such as Test Cricket, One Day Cricket, T20 International and Indian Premier League (IPL).
Technologies – AngularJS, HTML, CSS3
Role – Coding and Designing

➢ **www.harekrishnalogistics.co.in –** website for the logistic company "Hare Krishna Logisitics".
